

js-transition-perf-measures

Alex Masselot

12/23/2016

```
library(ggplot2)
```

You can also embed plots, for example:

```
dt.cycle.times = read.delim('data/cycle-times.txt')
dt.perf = read.delim('data/perf-data.txt')
dt.perf$engine=paste(dt.perf$engine, '.js', sep='')
dt.perf$is.transparent = dt.perf$opacity <1
```

```
.dt = subset(dt.perf, ! is.transparent)
dt.process.unit = rbind(
  data.frame(engine=.dt$engine,
    n=.dt$n,
    usage=.dt$cpu,
    process.unit='CPU'
  ),
  data.frame(engine=.dt$engine,
    n=.dt$n,
    usage=.dt$gpu,
    process.unit='GPU'
  )
)
```
